Gladiolus Beautiful

Vigorous Northern-grown Bulbs, all
ready to bloom for you in
your own garden

HOWARD M. GILLET

GLADIOLUS SPECIALIST
NEW LEBANON, N. Y.

Flowers

Food and raiment are for the body,
but flowers! flowers are for both body and
soul.

When my lips are palsied by great emotions
—love, gladness, sorrow, death,
—and the words I would write come not,
then I send ‘soul-messages’—FLOWERS.

When I look upon a Rose,
all nightmares of atheism vanish;
When I inhale the rare perfume of Violets,
I bow to the Master Chemist;
When my pencil tries to trace
the graceful flutings of the Dahlia
Or my brush match the Exquisite
Color blendings of the modern Gladiolus,
I reverently acknowledge the High Hand of
Art.

Some days when I am
in perfect attune with the Creator—God,
I know I hear melodies
Strangely sweet among my flowers,
And Songs—songs like morning stars
Must have sung together at the birth of
HIM—The Rose of Sharon.

Without flowers my body could live,
but I know my soul would starve.

Will P. Snyder.

ONE OF MY FIELDS, SHOWING THE VARIETY 'ELORA'
IN THE CENTER

THE MODERN GLADIOLUS

Many people are taking up Gladiolus growing as a hobby. And a delightful hobby it is! To watch, for the first time, the unfolding of a new variety is to the real flower lover a quite thrilling event.

And do you know that a vase of Gladiolus will retain its beauty for more than a week, if the water is changed daily, and a half-inch or more cut off the bottom of the stems?

Remember, too, that an investment in these bulbs will not only give you pleasure this year, but for years to come.

A wonderful improvement has been made in the Gladiolus during the last few years. Those who are acquainted only with the old red spikes which grew in Grandmother's garden will hardly recognize it as they gaze on the large and gorgeous flowers of the modern hybrids which are the result of thousands of crosses made by specialists in this line. The newer kinds embrace many varieties producing from 12 to 20 blooms on a single spike, many of which will measure from four to six inches across. Nearly all the colors of the rainbow may now be found. The combinations of colors and beautiful markings of the petals and throat cannot be surpassed by any other flower. As sturdy as the lily and as exquisite as the expensive orchid it may be grown successfully by the amateur in any ordinary garden, and if several plantings are made in the spring at different times, bloom may be had from the end of July until frost. Covering the widest range of color from the brightest blood-red scarlet, deep purple and rich carmine shades to the most delicate tints of white, pink, yellow and lavender, they prove at once the most showy and attractive of garden flowers. They are rightly called "The People's Orchid." With freedom from disease and insect pests there is no easier flower to grow. No other flower gives so much satisfaction at small expense. If you have never planted any of the newer varieties such as are offered you in this booklet, give them a trial. They will be a delight to the eye and a joy to the soul.

On account of its good keeping qualities the Gladiolus surpasses all other flowers for cutting purposes, and in order to obtain the utmost pleasure from the blooms you should place them in vases in the house. The Gladiolus is particularly adapted to table decoration. Cut the spike in the morning or evening when the first bud opens, leaving at least four leaves on the plant to mature the bulb. Change the water daily, remove the withered portions, and cut (on a slant) an inch or so from the end of each stem. Every bud will open one by one to the very top, and a vase of blooms may be kept fresh and beautiful for a week or ten days.

CULTURE

If you can grow potatoes you can grow Gladiolus. Plant in any good garden soil as soon as ground is workable up to the middle of June. If several plantings are made at different times the season of bloom will be lengthened. Do *not* plant in shade of trees or buildings, and do not allow *fresh* manure to come in direct contact with bulbs. Use well-rotted manure, commercial fertilizer, wood ashes, or bone meal, well mixed with the soil. Set the bulbs five to six inches deep in rows and about three to four inches between each bulb. Rows about 18 inches apart. Or may be massed in beds about four inches apart each way. If planted in quantity and to be cultivated with a horse make rows 30 to 36 inches apart. Keep soil loose and free from weeds. When cutting flower spike let at least four leaves remain on the plant to allow the bulb to mature properly. Dig bulbs in the fall, cut off tops, and after drying in the open air for a few days store away in a dry, cool but frost proof place in the cellar.

Good Garden Labels

may be made by planing lath to a smooth surface, cutting them into one-foot lengths, and sharpening. Dip the sharpened ends into wood preserver, paint the upper half white, and when dry paint the name on with a small camel's-hair artists brush, using black paint. Be careful not to let the paint lap on the wood preserver as wood preserver dissolves paint. Such labels will last for a number of years.

WHAT THEY SAY

Some Extracts From Letters

"Your bulbs were the nicest size of any bulbs I bought last year. Had large beautiful blooms. Sure were fine."—Mrs. D. A. F., Gibbstown, N. J.

"I received from you yesterday as fine a lot of Gladiolus bulbs as I ever got. I certainly am proud of them, and will speak a good word for you whenever I can. I have been getting glad bulbs for several years from different growers and these go far away ahead of any I ever received."—A. B., Bremen, O.

"You surely do send lovely large clean bulbs and I am more than satisfied with them. I had beautiful glads last year from your bulbs and I like to do business with you."—E. B., East Glastonbury, N. J.

"I have bought bulbs from five others and will say you have the best, cleanest largest bulbs of any one of them."—H. S. J., Warren, Pa.

"I have had such wonderful luck the last few years since I have been getting bulbs from you."—Mrs. F. K., Landingville, Pa.

"Feeling grateful for the fine bulbs you have sent me the last few years I beg to say of all the glad bulbs I bought from eight different growers yours are far the largest and cleanest of them all."—R. A. K., Yoe, Pa.

"The flowers have been blooming beautifully. It is a pleasure to plant and cultivate those fine, big healthy looking bulbs you send out from your gardens. It is also a pleasure to deal with a firm that is so prompt and courteous in its dealings."—B. O. G., Hempstead Gardens, N. Y.

"Back in February, I purchased 53 Gladiolus Bulbs from you, and now that they are through blooming I want to say that they were supreme. I am going to send to you for 250 more bulbs, named varieties, as soon as you send me your 1928 catalog."—N. W. K., Kalamazoo, Mich.

There is a fascination in growing these flowers of unrivaled loveliness.

The sword-like foliage; the tall, upright stems clothed with flowers of exquisite beauty; the great variety of magnificent colors; the ease of culture; the sureness of bloom; and the lasting quality when cut—all combine to make the Gladiolus one of our most popular flowers.
